Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The D/A encoding method claimed by the applicant is very close to Pulse Amplitude Modulation(PAM) and/or Amplitude Shift Keying(ASK). However, as the applicant states the primary difference is that a unique two amplitude cycle is being used to represent 4 or more bits(in the specification a 8 bit example is shown). Typically in PAM and ASK a single amplitude value or a pulse having constant amplitude is used to represent a symbol.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
